

John Martin

John Martin is the Principal of Pacific Energy Systems, Portland, Oregon. He is responsible for the general management and technical quality of all projects performed by Pacific Energy Systems and also provides consulting services directly to clients. Mr. Martin has over 39 years experience in the development of thermal power facilities including project financing, design, construction, startup, and testing of thermal energy and cogeneration plants. He has been the Project Manager or the Principal-in-Charge of over 70 thermal energy and cogeneration projects performed by Pacific Energy Systems in the last 17 years. These projects include responsibility as the Owner's Engineer/Project Manager and the Bank's Independent Engineer and cover the management of all phases of project development including financing, site selection, permitting, preliminary design, and project management during detailed design, construction, start-up and testing. Mr. Martin holds B.S. and M.S. degrees in Mechanical Engineering from the University of California and UCLA respectively and is a registered professional engineer in Oregon, Washington, and California.
